EMILLIO KURIA WAIRIMU

Nairobi, Kenya

Phone Number: +254703654000/+254755633857

Email Address: emilliokuria@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and tech-savvy customer expert operator with a strong foundation in computer science, statistics, and mathematics. proven experience in digital operations, technical troubleshooting, workflow optimization, and user-centric problem-solving. adept at translating complex technical issues into clear, actionable solutions for users, managing cross-functional communication, and utilizing data analytics to improve service delivery and customer satisfaction.

CORE COMPETENCIES & TECHNICAL SKILLS

- Customer Operations & Support: Omnichannel Customer Support, Technical Troubleshooting, Escalation Management, Service Level Agreement (SLA) Compliance, Client Onboarding, Quality Assurance (QA), Root Cause Analysis, User Experience (UX) Optimization.
- Computer Systems & Networking: Operating Systems (Windows, Linux environments), Network Configuration & Diagnostics (Cisco Packet Tracer), System Administration Concepts, Hardware & Software Troubleshooting, Cross-Device Connectivity.
- Software & Web Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, RESTful APIs, Git/GitHub, Cloud Deployment (Render), Visual Studio Code.
- Data Analysis & Reporting: Python, R Programming, Statistical Modeling, Data Cleaning & Validation, Microsoft Excel / Google Sheets (Advanced Formulas, Pivot Tables, Data Visualization).
- Digital & Productivity Tools: Ticketing & Workflow Systems, Microsoft Office Suite, Google Workspace, AI Productivity & Automation Tools, Command-Line Utilities (FFmpeg, CLI workflows).

RELEVANT EXPERIENCE

Digital Operations & Quality Assurance Specialist (Independent Contractor)

Remote (RWS, Clickworker, WritersHub) | *2025 – Present*

- Execute high-volume digital operations, data validation, and quality assurance tasks while strictly adhering to client Service Level Agreements (SLAs) and formatting guidelines.
- Analyze complex user queries and project briefs to deliver accurate, well-researched written and technical solutions within tight turnaround times.
- Perform systematic error checking, system evaluation, and AI data training assessments to improve platform response accuracy and end-user experience.
- Maintain clear, proactive communication across project channels to resolve guidelines ambiguities and ensure 98%+ quality approval ratings.

Full-Stack & Front-End Web Developer (Project-Based)

Nairobi, Kenya | *October 2025 – Present*

- Designed and developed customer-facing service layouts and product category interfaces for the Edensafi e-commerce platform using HTML, CSS, and JavaScript, focusing on intuitive navigation and responsive user experience.
- Consulted with individual clients—including drafting, designing, and deploying custom responsive web pages for Christine Wacera—translating client requirements into clean, user-friendly digital experiences.
- Built and deployed a full-stack web application on Render using Node.js, Express.js, and REST APIs to automate and manage customer contact form submissions and inquiry routing.
- Diagnosed and resolved front-end rendering bugs, broken API endpoints, and cross-browser compatibility issues to ensure seamless platform uptime.

Project Team Lead — Quantitative Research & Operations

Multimedia University of Kenya | *September 2026 – Present*

- Lead a 9-member academic research team conducting statistical credit risk modeling and survival analysis, coordinating task delegation, milestone tracking, and quality reviews.
- Act as the primary point of contact between team members and faculty supervisors, resolving workflow bottlenecks and ensuring timely submission of technical deliverables.
- Utilize Python and R to process datasets, run diagnostic tests, and present clear visual reports for stakeholder review.

Digital Content & Operations Coordinator

InnerShift Media (YouTube) | *December 2025 – Present*

- Managed end-to-end content operations, including workflow scheduling, script development, metadata optimization, and audience engagement strategies.
- Analyzed viewer retention metrics and user feedback to refine content delivery and improve overall channel performance.

EDUCATION

Bachelor of Science in Mathematics and Computer Science (Statistics & Operations Focus)

Multimedia University of Kenya — Nairobi, Kenya | *2023 – Present (Fourth Year)*

- Relevant Coursework: Operating Systems, Systems Programming, Computer Networks, Mobile Application Development (Android), Database Systems, Simulation and Modeling, Regression Analysis, Time Series Analysis.

KEY TECHNICAL PROJECTS

- Automated Client Inquiry & Portfolio System (2026): Engineered a Node.js and Express.js backend service to capture, validate, and route user inquiries reliably, deployed via GitHub and Render.
- E-Commerce User Interface Optimization — Edensafi (2025): Created responsive service cards and interactive product carousels designed to reduce user friction and improve customer conversion workflows.
- Network Simulation & Diagnostics (2026): Configured and troubleshot multi-node local area networks (LANs) and routing protocols using Cisco Packet Tracer to simulate enterprise-grade connectivity and fault resolution.

Certificate in Database Administration (DBA)

Giakanja high school — Nyeri, Kenya (2022)

- Key Competencies: Databases, Data Analysis & Reporting: Database Administration (DBA), Relational Database Management (RDBMS), Data Integrity & Record Management, Python, R Programming, Statistical Modeling, Microsoft Excel / Google Sheets (Advanced Formulas, Pivot Tables, Data Validation).

- **Operational Relevance:** Built an early technical foundation in structuring, querying, and safeguarding user records—directly supporting accurate CRM data management and back-end troubleshooting.

Kenya Certificate of Secondary Education (KCSE)

Giakanja high school — Nyeri, Kenya (2019 - 2022)

- Completed secondary education with specialized coursework in Computer Studies and Database Administration.
